

# ENHANCING CYBERSECURITY AT BSC GROUP WITH VIJILAN

## BSC GROUP

Industry:  
Managed Services Provider (MSP)  
Partnership Duration:  
Since 2018

BSC Group is a leading consultancy firm providing engineering, ecology, and environmental services. The firm has a complex IT environment that requires robust security measures to protect sensitive data and maintain compliance with industry regulations.

## THE CHALLENGE

BSC Group recognized the need to enhance its cybersecurity posture due to increasing threats and more stringent cyber insurance requirements. Initially, they implemented basic security measures like two-factor authentication (2FA) and CrowdStrike Falcon. However, they soon realized that a comprehensive Security Information and Event Management (SIEM) solution was necessary to improve their visibility into potential threats and ensure compliance.

## THE SOLUTION

Vijilan, a trusted provider of SIEM services, partnered with BSC Group to implement an advanced cybersecurity solution. After attending a presentation by Vijilan at the Falcon conference and consulting with other vendors, BSC Group chose to integrate Vijilan's SIEM services with CrowdStrike's LogScale platform.

## SIEM SERVICES

### Real-Time Monitoring

Vijilan provided continuous monitoring of BSC Group's IT infrastructure, ensuring real-time detection of potential threats and anomalies.

### Efficient Log Management

CrowdStrike LogScale was selected for its high performance in managing and analyzing log data. The platform's compatibility with existing tools like CrowdStrike Falcon was a key factor in the decision.

### Alerting

The SIEM solution included customizable alerts that provided peace of mind by notifying the team of everyday activities like password changes and domain additions, as well as more significant security events.

### Seamless Onboarding

The onboarding process was smooth, with Vijilan's team providing hands-on support, including secure credential management and expert guidance on system configuration.

### Incident Response

Although BSC Group has not yet faced any major incidents, the system is set up to provide rapid notifications in the event of a compromised password or unauthorized access.

## KEY STAKEHOLDERS

**SCOTT WESSON**  
Manager of Information Systems, BSC Group

**SCOTT WILSON**  
IT Director, BSC Group

# IMPLEMENTATION PROCESS

The implementation was conducted with minimal disruption to BSC Group's operations. According to Scott Wesson, the process was straightforward, with Vijilan's team taking the lead on most aspects, which was appreciated given the concurrent IT projects the team was handling. The strong communication and support from Vijilan were highlighted as key factors in the successful deployment.

*The implementation process was painless, and the support from Vijilan has been outstanding. We now have the visibility and control we need to protect our infrastructure. I highly recommend Vijilan to any organization looking to enhance their cybersecurity.*

Scott Wesson, Manager of Information Systems, BSC Group

# LOOKING AHEAD

BSC Group is focused on consolidating their current cybersecurity infrastructure before considering further advancements like Next Gen SIEM. They have expressed interest in ongoing collaboration with Vijilan, especially in exploring new integrations, such as a potential connector for their cloud file system, Ignite.

# CONCLUSION

Vijilan's SIEM services, combined with CrowdStrike LogScale, have successfully bolstered BSC Group's cybersecurity posture, providing them with the tools and support needed to safeguard their IT environment. The partnership between Vijilan and BSC Group is a prime example of how proactive cybersecurity measures can protect organizations in an increasingly complex threat landscape.

# KEY BENEFITS

**Enhanced Visibility** The SIEM solution provided BSC Group with a consolidated view of their security landscape, making it easier to monitor activities and identify potential threats.

**Improved Security Posture** The iterative changes led by Scott Wesson and Scott Wilson, including the integration of SIEM, have significantly modernized BSC Group's IT security framework.

## Proactive Security Management

The proactive approach to cybersecurity, initiated by BSC Group's leadership, has ensured that the firm remains ahead of potential threats and in compliance with cyber insurance requirements.

## Positive User Experience

The overall experience with Vijilan was described as professional and efficient, with particular praise for the support and communication during the onboarding phase.
