vijilan IT Security: Enabled

CASE STUDY

MSSP REDUCES SIEM COSTS BY 40% WITH LOGSCALE & CRIB

CLIENT

Established Managed Security Service Provider (MSSP)

KEY METRIC S

40% SIEM COST Reduction

3X Faster Query Performance

50% Reduction in Data Storage

THE CHALLENGE

Spiraling data ingestion and legacy SIEM licensing costs were eroding service margins.

Slow query speeds were hampering the SOC team's ability to conduct rapid threat investigations.

Onboarding new, diverse client log sources was complex and time-consuming.

THE SOLUTION

Deployed CrowdStrike Falcon LogScale as a modern, high performance SIEM replacement.

Implemented Vijilan's Managed Cribl Services to intelligently filter, route, and enrich all data before ingestion.

Provided expert services to manage the full migration and create custom detection rules and dashboards.

> ***Vijilan didn't just sell us a new platform; they solved our core data problem. Their expertise with Cribl was the game-changer, cutting our costs by 40% and making our threat hunters more effective overnight***

SOC Director,MSSP Partner

THE VIJILAN DIFFERENCE

Data Optimization Expertise

We use Cribl to solve the "data chaos" problem at the source, cutting costs and improving data quality.

Active Remediation

Our 24/7 SOC doesn't just alert; we actively contain and remediate threats to minimize business impact.

Partner-Centric Model

We provide the technology and expertise to empower our partners to deliver superior security services.
