MSP-Demo THREATDEFEND FOR CASINOS & GAMING

SECURING PLAYER DATA. PROTECTING TRANSACTIONS. ENSURING GAME INTEGRITY.

Top Cybersecurity Threats Facing Casinos & Gaming Companies

- 1 Data breaches involving player PII, financial, and loyalty information
- 2 Ransomware attacks disrupting casino floor and online platforms
- 3 DDoS attacks targeting online betting or gaming portal
- 4 Credential stuffing and account takeover attempts
- 5 Regulatory compliance issues (e.g., PCI DSS, gaming commission rules, GDPR)

Pain Points

Casino & Gaming Sector

- ✓ High transaction volume and sensitive personal data
- ✓ Hybrid environments combining physical security and online gaming systems
- ✓ Need to ensure uptime and performance during peak hours
- ✓ Strict regulations and audits from gaming authorities

Why It Matters

Casinos and gaming platforms are highvalue targets due to their financial data, regulatory oversight, and reliance on uptime. MSP-Demo ThreatDefend helps protect player data, secure transactions, and defend brand reputation — whether on the casino floor or online.
