MSP-Demo THREATDEFEND FOR EDUCATION

PROTECTING STUDENT DATA. ENABLING SAFE LEARNING ENVIRONMENTS. ENSURING COMPLIANCE.

Top Cybersecurity Threats Facing Education SMBs

- 1 Ransomware targeting student records and academic systems
- 2 Phishing attacks on faculty and administrative staff
- 3 Unauthorized access to learning management systems and portals
- 4 Shadow IT and unmanaged devices on school networks
- 5 FERPA and data privacy compliance risks

Pain Points

Education

- ✓ Underfunded IT and cybersecurity programs
- ✓ High number of users and endpoints (students, faculty, devices)
- ✓ Increased reliance on remote learning platforms
- ✓ Lack of visibility into user activity and network behavior

Why It Matters

Educational institutions are among the top targets for ransomware and data theft, often due to limited resources and a large attack surface. MSP-Demo ThreatDefend brings enterprise-grade protection to schools and universities, ensuring student privacy and academic continuity.

RELEVANT THREATDEFEND MODULES

Falcon Identity Protection

Monitor user behavior and protect account access

Falcon Discover

Track devices, apps, and login activity across networks

Falcon Exposure Management

Address vulnerabilities in a scanless, real-time way

Falcon LogScale (Next-Gen SIEM)

Detect threats with scalable, real-time analytics

24/7 SOC Monitoring

Alert response and rapid containment

Take Action

Schedule a no-obligation Cyber Safety Review with MSP-Demo to uncover risks in your school's environment and learn how to improve protection across systems, users, and devices.
