MSP-Demo THREATDEFEND FOR HOSPITALITY

SECURING GUEST DATA. ENABLING SEAMLESS OPERATIONS. BUILDING TRUST THROUGH PROTECTION.

Top Cybersecurity Threats Facing Hospitality Businesses

- 1 Payment card theft and point-of-sale (POS) malware
- 2 Ransomware disrupting reservation and booking systems
- 3 Credential stuffing and account takeover on guest portals
- 4 Phishing attacks on front desk and administrative staff
- 5 Guest data privacy violations and PCI DSS non-compliance

Pain Points

Government

- ✓ Complex IT environments across multiple properties and systems
- ✓ High turnover and seasonal staff increase risk of human error
- ✓ Limited visibility into unmanaged and IoT devices
- ✓ Pressure to protect guest privacy and uphold brand trust

Why It Matters

The hospitality sector is a high-value target due to its reliance on digital systems and sensitive guest data. MSP-Demo ThreatDefend helps hotels and resorts safeguard operations, protect guests, and meet data privacy and compliance standards.

RELEVANT THREATDEFEND MODULES

Falcon Identity Protection

Monitor staff access and prevent account misuse

Falcon Discover

Inventory devices, detect unauthorized access, and monitor user activity

Falcon Exposure Management

Eliminate vulnerabilities that threaten uptime

Falcon LogScale (Next-Gen SIEM)

Detect incidents in real time across all sites

24/7 SOC Monitoring

Provide always-on coverage to protect guests and operations

Take Action

Schedule a Hospitality Cybersecurity Readiness Consultation with MSP-Demo to uncover vulnerabilities and implement stronger protection across your properties and systems.
