MODERN CYBERSECURITY IN A SINGLE MANAGED SOLUTION

THREATDEFEND

POWERED BY THE CROWDSTRIKE FALCON PLATFORM AND DELIVERED BY MSP-Demo

[ThreatDefend] is a unified, modular cybersecurity solution built for today's dynamic threat landscape. Powered by the CrowdStrike Falcon pla orm and delivered by MSP-Demo, it combines best-in-class detection, response, identity protection, cloud security, and observability into a single, scalable service. Whether protecting endpoints, users, assets, or workloads, [ThreatDefend] delivers enterprise-grade security with the simplicity and support of a managed service.

The Challenge

Siloed Tools and Limited Resources

Organizations face rising threats with limited sta , budget, and time. Siloed tools require complex integration, generate too many alerts, and miss key indicators. Security operations become reactive and resource-intensive, leaving businesses vulnerable to ransomware, insider threats, and compliance failures.

The Solution

THREATDEFEND

[ThreatDefend] unifies all critical security functions—delivered by MSP-Demo and powered by CrowdStrike—into a flexible, fully managed service. With a modular architecture, clients can deploy only the components they need while ensuring seamless integration and centralized visibility.

- **Endpoint Detection & Response (EDR/XDR):** Real-time threat detection and automated response
- **Identity Protection:** Enforce Zero Trust and stop credential-based attacks
- **Exposure Management** Prioritize vulnerabilities and reduce attack paths **IT Hygiene & Asset**
- **Visibility** Discover rogue assets and unauthorized soware **Next-Gen SIEM & Observability** Index-free analytics and threat hunting with Falcon LogScale **Cloud Workload**
- **Protection** Secure containers, VMs, and cloud-native applications **24/7 SOC Monitoring** Human-led triage, hunting, and response around the clock

Why Clients Choose MSP-Demo with [ThreatDefend]

- **Simplicity** One solution, one provider, fully managed
- **Scalability** Add or remove modules as needs evolve
- **Exper tise** Backed by the power of CrowdStrike and MSP-Demo's security operations team

- **Compliance**
  Supports HIPAA, PCI, CMMC, NIST, ISO 27001, and more
  ROI
- Reduce breach risk, tool sprawl, and operational burden

Ideal Use Cases

- Mid-sized businesses looking to outsource or enhance their cybersecurity posture
- Organizations in regulated industries needing compliance-ready solutions
- IT teams wanting to consolidate tools and streamline security operations
- MSPs and MSSPs seeking white-labeled managed services for their customers

Integrated, Modular, and Always-On

Every module in [ThreatDefend] is tightly integrated for maximum efficiency, visibility, and response. From identity to endpoint to the cloud, telemetry flows seamlessly across the platform. MSP-Demo ensures 24/7 support, threat hunting, and incident response, acting as a true security partner—not just a vendor.

Next Steps

Bring Security Together with ThreatDefend

Cybersecurity shouldn't be fragmented or out of reach. [ThreatDefend], powered by the CrowdStrike Falcon platform and delivered by MSP-Demo, gives your organization the protection, visibility, and control it needs—without the complexity.
Contact MSP-Demo today to explore how [ThreatDefend] can transform your cybersecurity operations and resilience.
