

THREATDEFEND FOR EDUCATION

Protecting student data, instructional continuity, and digital learning environments

Relevant ThreatDefend Modules

Falcon EDR/XDR

Protect student and staff devices from malware, ransomware, and system compromise

Falcon Identity

Stop compromised account use in portals, LMS platforms, and collaboration tools

Falcon Discover

Gain visibility into devices, users, and cloud tenants across K-12 and higher ED environments

Falcon Exposure

Prioritize vulnerabilities affecting LMS, SIS, and educational software

Cribl Stream

Enable secure log routing from Google Workspace, Microsoft, and school firewalls

Top Cybersecurity Threats Facing Education

1

Ransomware Attacks

Shutting down classrooms, interrupting instruction, and locking users out of learning systems

2

Account Misuse

Compromised student or faculty accounts used for inappropriate access or data exposure

3

Compliance Gaps

Lack of FERPA, CIPA, or insurance-aligned logging and monitoring

Take Action

Educational institutions must secure cloud environments, user identities, and devices while meeting compliance and funding mandates.

Why It Matters

Cyberattacks in education affect learning outcomes, funding eligibility, and student safety. ThreatDefend helps school systems stay protected, accountable, and resilient.
