

THREATDEFEND FOR RETAIL & ECOMMERCE

Protecting transactions, brand loyalty, and PCI-aligned operations

Relevant ThreatDefend Modules

Falcon EDR/XDR

Secure endpoints across POS systems, HQ offices, and remote staff

Falcon Identity

Monitor logins across ecommerce platforms, CRMs, and partner portals

Falcon Discover

Map and manage cloud infrastructure, store networks, and retail devices

Falcon Exposure

Prioritize vulnerabilities tied to ecommerce plugins and transaction flows

Cribl Stream

Simplify PCI-compliant logging and alert routing across platforms

Top Cybersecurity Threats Facing Retail & Ecommerce

1

POS Malware & Ransomware

Targeting store systems to steal card data or disrupt business

2

Credential Theft

Compromised logins used to commit fraud in ecommerce portals

3

Compliance Risk

Gaps in PCI-aligned logging and monitoring across infrastructure

Take Action

Retailers must protect the entire transaction chain, from store to cloud, to preserve trust, meet compliance, and maintain revenue.

Why It Matters

One breach can ruin a brand. Modern threats demand end-to-end visibility, fast containment, and continuous protection across retail environments.
